EFFECTIVE SOLUTIONS

for today's

WOUND CARE CHALLENGES

Trusted products. Proven results.
Partners in practice success.

We're more than a distributor — we're your partner in delivering better care. Backed by deep expertise in healthcare, compliance and biologics, New Horizon Medical Solutions delivers tailored, scalable solutions that simplify operations and strengthen patient outcomes.

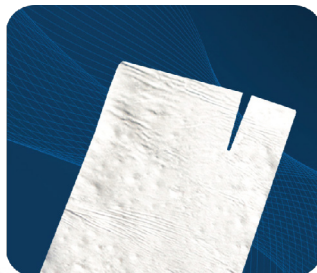

CMS-approved solutions
for modern wound care.

New Horizon Medical Solutions provides healthcare teams with advanced biologic products that support wound care, help improve patient outcomes, and reduce clinical complexity. Our amniotic membrane-based skin substitutes are designed to integrate seamlessly into practice workflows — supporting high-quality care while facilitating compliance with reimbursement guidelines.

XCELL AMNIO MATRIX

Xcell Amnio Matrix™ (XAM) is a lyophilized amniotic membrane allograft developed to protect wounds across a broad range of acute and chronic conditions. [Q4280](#)

XCELLERATE

Xcellerate® is a lyophilized amniotic membrane allograft with an extracellular matrix providing robust wound coverage, making it a powerful tool for both outpatient and surgical wound care protocols. [Q4234](#)

AMCHOPLAST

AmchoPlast™ is a cutting-edge, sterile, minimally manipulated, dehydrated allograft designed to support homologous use in clinical applications. [Q4316](#)

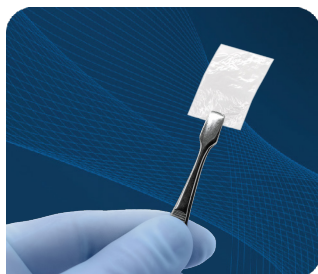

VITOGRAFT

VitoGraft® is a next-generation dual layer allograft derived from amnion and is designed to provide optimal wound coverage. This advanced allograft supports enhanced tissue adherence along with heightened strength and effortless handling. [Q4317](#)

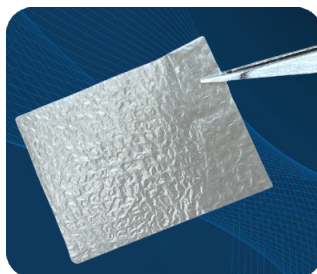

XCEED TL

Xceed TL™ is a tri-layer placental-derived allograft matrix developed using advanced processing techniques, which aims to maintain structural integrity while maintaining native properties. [Q4353](#)

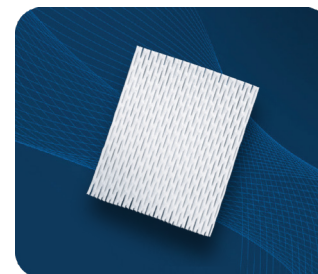

SANOGRAFT

SanoGraft® is a single-layer allograft derived from amnion, designed for both wound covering and surgical applications. As a protective barrier, SanoGraft shields acute and chronic wounds from the surrounding environment. [Q4319](#)

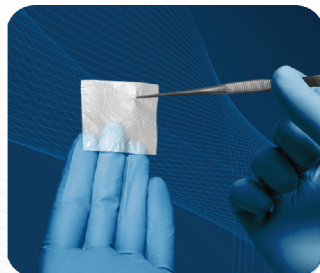

ABIOMEND XPLUS

Abiomed Xplus Membrane is an advanced, crosslinked, chorion-free amniotic tissue designed to enhance coverage. [Q4355](#)

MATRIX HD

Matrix HD Dermal Fenestrated Matrix is a sterilized, acellular human dermis that is provided with on-the-shelf storage and has a five-year shelf life. [Q4345](#)

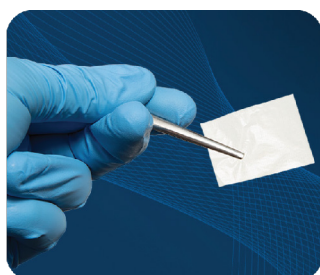

AMNIO-MAXX

Amnio-MAXX® is a premium amniotic allograft designed to support and protect chronic wounds. [Q4239](#)

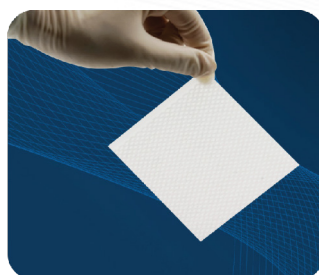

DERM-MAXX

Derm-Maxx™ is an acellular human dermis graft sterilized using the Tutoplast® Tissue Sterilization Process. [Q4238](#)

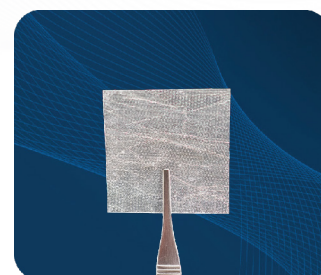

MEMBRANE WRAP

Membrane Wrap™ is a sterile, easy-to-handle amniotic wrap designed for surgical and post-trauma use. [Q4205](#)

MEMBRANE WRAP HYDRO

Membrane Wrap Hydro™ is a hydrated amniotic membrane with a dual amnion layer, which allows application in more complex wounds. [Q4290](#)

TRI-MEMBRANE WRAP

Tri-Membrane Wrap™ is a triple-layer (amnion/chorion/amnion) dehydrated human amnion membrane (dHAM) which providers prefer due to the inherent tensile strength. [Q4344](#)

ADVOGRAFT MEMBRANE DUAL

AdvoGraft Membrane Dual™ is a dehydrated, dual-layer placental allograft engineered to provide structural integrity for the enhanced protection of deep or complex wounds. [Q4382](#)

ADVOGRAFT ONE

AdvoGraft One™ is a dehydrated, single layer amniotic membrane allograft derived from human placental tissue. [Q4380](#)

New Horizon Medical Solutions is at the forefront of biologic innovation and practice optimization. We develop and distribute tissue products supported by reimbursement expertise and operational efficiency, empowering providers to improve patient outcomes.
